

Recycle Fun

By Karen Whiting and Rebecca White

Recycle Relay Race

To help remember what you can recycle and share it with your friends hold a recycle relay race.

1. Put a container of items that include things that can and can't be recycled at one end of your yard.
2. Line up in 2 equal teams with a box for each team at the other end of the yard.
3. Have a set time (like 5 or 10 minutes) and set a timer for that amount of time.
4. The first person in each team runs down to the container and getting out an item that can be recycled.
5. Once a person returns to the start the next person in their line can run down and get an item.
6. At the end of the time – whichever team has the most items that can be recycled in their container wins.

Recycle and reusing memory game

Fill a tray with items that can be re-used or recycled. See who recalls the most and who gets them in the right category: biodegradable/can be recycled/can be reused. Here are some ideas.

- Paper scrap
- Toilet paper roll (cardboard)
- Plastic bottle or top
- Piece of cloth
- Can
- Rechargeable battery
- CD or DVD
- Piece of wood
- Metal scrap
- Foil (aluminum)
- Toy
- Small toy (car)
- Flip flop
- Styrofoam packing peanut
- Ink cartridge
- Cellphone
- Book
- Eyeglasses
- Plastic toothbrush
- Plastic bag

***Add a new element to the memory game. Divide into teams and let each team brainstorm ways to reuse items on the tray. See who creates the longest list.
